ADVENTURES

FAQ

OVERVIEW

This document contains answers to frequently asked questions for *The Mandalorian™*: Adventures.

GENERAL

Q: What should you do if the number of players does not match the number of characters listed in the mission?

A: Each player always controls 1 character unless using Shared Character mode. The characters listed in the mission are only suggested characters, you can use any characters (with Sandbox mode).

PLANNING CARDS

Q: Can you choose not to use a planning card?

A: Yes, all planning cards are optional.

Q: When dealing yourself damage, can you block it?

A: Yes

Q: Can you use the same planning card twice in the same turn (ie: use "Strategize," get a new one by planning, then use the new "Strategize" card).

A: Yes

Q: When using "Strategize" in solo/shared character mode, which character uses the extra action?

A: Any character can use the extra action.

Q: Can you use "Strategize" in the middle of resolving an action or event card?

A: No. But you can use it during any step of your turn (even the event step before or after drawing a card).

Q: Can Paz Vizsla wait until after a player has drawn planning cards to use his character ability?

A: Yes

EVENT CARDS

Q: When choosing which enemies to move, do you have to choose enemies that will cause the most attacks possible by the card?

A: No. You only need to choose enemies that will move at least 1 space. When choosing who attacks, you must make the most enemies attack as possible (based on their current locations).

Q: How do you determine the "nearest" enemy or character for events (for example "Close Quarters Combat")?

A: If the effect **moves** the enemy, determine nearest by counting the amount of movement needed to reach that space. This will sometimes be a different enemy when measuring range (range ignores elevation, but movement does not).

Q: Will an enemy move if this will prevent it from attacking?

A: Yes. Enemy movement is unaffected by whether it is attacking on that card or not. In rare cases, moving toward the nearest character will move the enemy outside of attack range.

Q: What if the nearest enemy is in your space with "Close Quarters Combat"?

A: No enemy moves. The enemy in your space will then attack you as normal.

Q: If you choose to be dealt damage from the "Concussion" event card, do you draw another event card?

A: No. You only draw another event if you discard a skill card and that skill card has no ability.

FEATURE TOKENS

Q: Can you use multiple features on your turn?

A: Yes

Q: In solo/shared characters mode, can a character use a feature if they are not performing an action?

A: Yes, but only when sharing characters.

DISRUPT TOKENS

Q: When disrupting the action slot with the lowest strength, and there is a tie, do you decide before or after seeing the value?

A: You choose the action slot before revealing the disrupt token.

Q: If you disrupt an enemy carrying The Child, do they drop The Child?

A: No

Q: In Mission 4, does the crisis deal damage to characters if Moff Gideon is disrupted?

A: Yes. The crisis in not an attack and the damage is dealt even if Moff Gideon is disrupted.

SKILL CARDS AND CHARACTER ABILITIES

Q: Can I use a tactical ( ) skill card to perform a 0 strength intel action on an enemy in my space?

A: No. When playing a tactical skill card, you do not get to use the action.

Q: When an ability deals damage "before enemy abilities" how does this affect enemies with the tough ability ( )?

A: Tough is unaffected (it may still block damage).

THE MANDALORIAN

Q: How does the "Gauntlet Whipcord" work against facedown enemies with abilities (like sentry or the mission specific icon)?

A: You cannot use this on a facedown enemy, but if you flip it faceup (by attacking it or moving into its space), you can disrupt it and cancel its abilities.

Q: When using "Beskar Helmet," do you search the planning deck or discard pile first? Do you shuffle the deck if you only search the discard pile?

A: You can search one or both, in the order of your choice. Regardless, always shuffle the planning deck afterwards.

XI'AN

Q: When Xi'an searches her deck or discard pile for a card, does she show it to other players before adding it to her hand?

A: If the card comes from her deck, this is secret. If it comes from her discard pile, this is open information.

Q: When using "A Lady Never Tells" or "Unpredictable" skill cards with solo/shared characters, can you discard cards belonging to other characters?

A: Yes. If you discard another character's card for "Unpredictable," that character resolves the action (not Xi'an).

Q: When using the "Agility" skill card, what is the "top" card of an action slot?

A: The top card of the action is the most recently played card.

Q: What happens if you use the "Surprise Dagger" ability before the intel action, and this ability defeats an enemy, thus discarding this skill card?

A: You can still resolve the intel action as normal.

IG-11

Q: What happens if IG-11 is disabled in solo/shared character mode?

A: IG-11's skill cards can no longer be used. Whenever you have 1 in your hand, discard it and draw a replacement.
